

## HELP OUR FOUR-LEGGED FRIENDS *The following items can be made & donated to your local animal shelter:*

### Kitties

#### **Option 1** – Get some calcium!

1. Use a milk ring & some felt strips; number varies on width cut
2. Double knot each strip to cover all the way around the ring

#### **Options 2 & 3** – Save those TP rolls you stocked up on!

1. Grab a toilet paper roll and a pair of scissors
2. Cut short, thin strips around both ends of the tub (about every ¼")
3. Bend all the strips 90° backwards

-OR-

1. Cut your empty TP roll into narrow rings
2. Take 4 rings, and insert one inside the other at perpendicular angles to form a ball

#### **Option 4** – Socks without partners now have a purpose!

1. Use an infant or child sock
2. Fill with a mix of stuffing and catnip
3. Sew shut

### Pups

#### **Option 1** – Have any scrap fabric, shirts, or towels?

1. Cut 3 long strips of fleece, or an old towel at the same length
2. Tie off all 3 pieces at one end & tightly braid
3. Tie off a second knot at the bottom to secure

#### **Option 2** – Reuse those jars!

Eating a lot of PB&J sandwiches while you're home?

Save the 'almost empty' peanut butter jars for the dogs to finish up for you!

They love being entertained with the treat stuck in the 'toy.'

#### **Option 3** – Puppy Mush Recipe

Ingredients: 1# Ground Beef | 3C Rice | 1 bag frozen broccoli | 1 clove garlic

Directions: Cook the beef & garlic. Cook rice. Mix all ingredients together and separate into bags. Keep frozen until delivery.

Puppy mush is used to feed puppies and sick dogs who need a bland diet with nutrition. It is used by WCHS at least five days a week, sometimes twice a day.
